Avocent Outlook KVM Switch

Outlook KVM Switch

OSCAR GUI On-Screen Display

With advanced on-screen menuing, the OutLook KVM switches offer simple point and click access to your servers. OutLook's extensive functionality also includes programmable naming, scanning, security and system broadcast features. The 8-port OutLook 180ES is a single-user system that controls up to 128 computers from a single console. The 16-port OutLook 1160ES accommodates PC and Sun platforms and supports Intel, Sun, Macintosh, HP-9000, RS-6000 and Windows NT. The OutLook 2160ES supports dual users and provides extensive multi-server access. The OutLook 4160ES controls up to 256 computers from one console and supports four users.

For advanced access and control, OutLook uses the patented OSCAR on-screen configuration and reporting GUI. The OSCAR interface provides a Windows-like GUI to control all administrative functions and settings. OSCAR uses intuitive menus for system configuration and server selection and provides server status information at a glance. OSCAR also supports multi-platform server environments and includes support for multiple languages. With OSCAR, users easily benefit from convenient server identification and selection. Administrators can establish preferred user-defined naming conventions to create server lists and locate servers.

OutLook KVM switches are designed to optimize valuable space, time, power and hardware in the most extreme conditions. The OutLook is highly scalable and accommodates multiple users and computers as the server population grows. The 1U high-density design conserves valuable rack and server space, while providing improved cable management to minimize unnecessary cable bundles.

- Control up to 256 computers from one console
- Multi-language support
- Innovative locking cables eliminate a point of failure
- OSCAR GUI interface
- Flash memory for easy upgrade
- Serial Port RS-232
- Microsoft DDC Plug & Play compliant
